PROFILE

I'm a Front End Developer, I am very adaptative to different ways to work because I think the most important thing is to learn the basics very well and figure out what is the best approach for the team and the product. That's why in my side projects I try to use fewer libraries possible and try to understand how things work. I really love what I do and that's why I am learning always and one of my professional dreams is to have a personal product in Product Hunt

SKILLS

React

Html

Css

Redux

Nextjs

Gatsbyjs
